

# One-Day Online Training Program on CYBER SECURITY – EMERGING THREATS & SOLUTIONS

**Date:** 21<sup>st</sup> January 2022 (9.30 am to 5.30 pm)

**Jointly Organized By**

## Introduction

As modern day activities are more dependent on digital platforms, protection of identity and information is of utmost importance to avoid information getting into wrong hands. Further, cybercrimes are getting more advanced and complex, depending only on anti-virus solution to protect our information would not suffice. Cyber security is a process of protecting our information from cyber attacks emanating from various sources – both online and offline modes. This training program will help us know more about the emerging cyber threats and the relevant solutions to protect our information.

## Objectives

- Understanding latest emerging trends in cyber-attacks
- Being aware of critical personal & professional data and its protection
- Understanding threats that target online payments & social networking applications
- Understanding the legal framework related to cyber security
- Awareness on taking various corrective actions upon reporting of cyber attacks

## Who should attend?

Employees from all fields viz. banks, financial institutions, executives from service and manufacturing industry, IT industry, Government departments, students, scholars and faculty members from academic institutions/Universities, Entrepreneurs and individuals who use mobile and desktop applications for their financial transactions social networking and other requirements.

## Training Methodology

Interactive sessions by industry experts with case studies, panel discussions by industry/legal experts, Question & Answer sessions

## Key Take-away

- Learn how to protect your devices, precious data and most importantly your money
